The Comptroller's comment opened up a discussion of the subject, and Commissioner Waring, who sat at the Mayor's right hand, heard some very nice things said about himself.

All the members of the Board told him that in their belief the deficit in his accounts was justified, because he has really cleaned the streets, and Mayor Strong actually beamed upon the Colonel as he said:

"I believe that the Commissioner has cleaned the streets better than they have ever been cleaned and that he will keep them clean for less money than he has asked for."

This, however, did not prevent the usual 5 per cent, dividend from being declared each year, and the company's directors have been told by Attorney-General Hancock that these dividends must be returned. The capital stock of the company is \$400,000. An examination last April showed this to be impaired by \$330,000. The examiners—found on the cooks 170,000 of fictitious business, and a report of the errors was sent to the Attorney-General.

At the office of 'he American Fire Insurance Company, at 146 Broadway the officers were greatly worried to-day the officers were greatly worried to see what could be done to make it up. That Committee reported to the full Board to-day that of the \$2,350,000 approprieted at the beginning of the year, 195,000 was expended for the special purpose of removing snow and icc. which, with the expenditures above the average, will leave an apparent deficit of \$101,427.71 to be made up during the last six months of the year.

The cost for cleaning the streets during the present month and the average of expenditures is \$235,000, while the remainder of the appropriation on hand will permit of so expenditure of \$152,600. The aggregate of the difference between the two sums represents the apparent deficit.

Col. Waring figures out that he will need \$515,000 or less.

As to the means for making up the deficit, the Cosmittee recommended to the Board the issue of short time health emergency bonds, as the may be needed from time to time. This is to be done by the Health Board certifying to the necessity for additional mency to clean the streets.

When the report was presented to-day there was no opposition to its adoption.

whether yesterday's deposit of nearly \$7,000,000 was in foreign gold is regarded as extremely doubtful, as no information has reached here of the arrival in this country of anything approximating that amount of gold.

It is thought therefore that this deposit was made by the syndicate in domestic gold in order to save interest. This domestic gold, of course, will be replaced by importations within the next few days, when the formal transfer of the bonds will be made.

As to the question whether the obligation of the syndicate to use its best efforts to protect the Treasury from withdrawals of gold for export ceases on the deposit of the full amount of gold called for by the contract Assistant Scoretary Hamlin declined to express an opinion.

From other officials, however, it is learned, it was the understanding with the syndicate at the time the contract was made that the obligation was to continue until Oct, i. The question, however, has not been formally raised, nor is it thought that it will be raised.

No doubt is expressed in any administrative quarter but that, independent of the assumed contract obligation, the syndicate will find it to its personal interest to continue to exercise its influence to protect the Treasury gold.

middle aged woman rushed into the office of the society and asked if they had her child. The little girl was brought out, and the mother clasped her in her arms. When she learned what had occurred, she almost lost her mind.

She finally became caim enough to accompany the officers to the Jefferson Market Folice Court, where the prisoner had been brought. She told Justice Simms that her name was Mrs. James Brennan, and that she was a widow, living at 257 Bowery. The little girl was her daughter, Carrie, three years old. She wandered away yesterday afternoon.
